

Safety & Compliance

eLearning Library

Rick Tobin

SAFETYNOW 105 West Park Drive, Suite 400 Brentwood, TN 37027

COURSES

Full Length (30-60 minutes)

Active Shooter Response

Prepare for the possibility of an active shooter situation with this course. Learn the best practices for responding to such incidents, including recognizing warning signs, developing emergency action plans, and understanding the principles of Run, Hide, Fight.

Aerial and Scissor Lift Safety

Ensure safety while using aerial and scissor lifts. This course covers the proper use, inspection, and maintenance of these lifts, as well as safety protocols to prevent accidents and injuries.

Asbestos Hazard Awareness

Gain an understanding of asbestos hazards in the workplace. This course provides information on the risks associated with asbestos, regulations for handling asbestos, and safe work practices to minimize exposure.

Asbestos Hazard Awareness - Canada

Learn about asbestos hazard awareness specific to Canada. This course covers the risks, regulations, and safe handling practices to protect workers from asbestos exposure in the Canadian context.

Back Safety and Injury Prevention

Prevent back injuries with effective safety practices. This course covers techniques for proper lifting, ergonomics, and exercises to strengthen the back and reduce the risk of injury.

BBP - Bloodborne Pathogens

Understand the risks associated with bloodborne pathogens and how to protect yourself. This course covers exposure control plans, personal

protective equipment, and procedures for dealing with potential exposures.

Behavior-Based Safety

Promote a culture of safety through behavior-based practices. This course covers the principles of behavior-based safety, including observation, feedback, and reinforcement techniques to improve workplace safety.

Cannabis Workplace Safety

Learn how to manage the safety implications of cannabis in the workplace. This course covers policies, procedures, and best practices for maintaining a safe and compliant work environment.

Chemical Safety

Ensure safe handling and use of chemicals in the workplace. This course covers hazard communication, proper storage, and disposal of chemicals, as well as emergency response procedures for chemical spills and exposures.

Chlorine Safety

Understand the hazards associated with chlorine and how to handle it safely. This course covers chlorine properties, safe handling practices, and emergency response procedures for chlorine-related incidents.

Cold Stress

Prevent cold stress in the workplace with this course. Learn about the dangers of cold stress, symptoms to watch for, and preventive measures to protect workers in cold environments.

Computer Security

Protect your organization's data and systems with effective computer security practices. This course covers topics such as password management, phishing, malware prevention, and secure use of technology.

Confined Space Entry - Permit Required

Learn the safety protocols for entering and working in confined spaces. This course covers the permit-required confined space entry process, hazard identification, and emergency rescue procedures.

Discrimination-Free Workplace

Promote a discrimination-free workplace with this course. Understand the different types of discrimination, legal protections, and best practices for creating an inclusive and respectful work environment.

Driver Safety

Improve driver safety with this comprehensive course. Learn defensive driving techniques, vehicle maintenance, and best practices for reducing the risk of accidents on the road.

Drug and Alcohol-Free Workplace

Create a drug and alcohol-free workplace by understanding the policies and procedures needed. This course covers the impact of substance abuse, testing procedures, and support for employees struggling with addiction.

Drug and Alcohol-Free Workplace - Canada

Learn about maintaining a drug and alcohol-free workplace in Canada. This course covers Canadian regulations, policies, and procedures for managing substance abuse in the workplace.

Electrical Safety

Ensure electrical safety in your workplace. This course covers electrical hazards, safe work

practices, and procedures for working with or around electrical systems and equipment.

Emergency Response

Prepare for emergencies with effective response plans. This course covers the development of emergency action plans, communication strategies, and procedures for various types of emergencies.

Fall Protection

Prevent falls in the workplace with comprehensive fall protection strategies. This course covers the use of personal fall arrest systems, guardrails, and other fall prevention measures.

Fire Safety

Learn essential fire safety practices to protect your workplace. This course covers fire prevention, use of fire extinguishers, evacuation procedures, and emergency response plans.

First Aid: Fundamentals

Gain basic first aid knowledge and skills. This course covers common medical emergencies, first aid procedures, and the use of first aid kits to provide immediate care until professional help arrives.

Flammable Liquid Safety

Handle flammable liquids safely with this course. Learn about the properties of flammable liquids, proper storage, handling techniques, and emergency response procedures for spills and fires.

GHS Hazcom - Hazard Communication

Understand the Globally Harmonized System (GHS) for hazard communication. This course covers the classification and labeling of chemicals, safety data sheets, and employee training requirements.

Hand and Power Tools

Ensure safe use of hand and power tools. This course covers tool selection, proper use, maintenance, and safety practices to prevent injuries while using tools.

Hand Safety

Protect your hands from workplace hazards. This course covers common hand injuries, protective equipment, and safe work practices to reduce the risk of hand injuries.

Hearing Conservation

Implement a hearing conservation program in your workplace. This course covers the risks of noise exposure, hearing protection devices, and best practices for preventing hearing loss.

Heat Stress

Prevent heat stress in the workplace. This course covers the dangers of heat stress, symptoms to watch for, and preventive measures to protect workers in hot environments.

Hot Work

Learn the safety protocols for performing hot work. This course covers fire prevention, permit requirements, and safe work practices for tasks that involve open flames or sparks.

Incident Investigation

Conduct effective incident investigations. This course covers the steps for investigating workplace incidents, identifying root causes, and implementing corrective actions to prevent recurrence.

Industrial Ergonomics

Improve workplace ergonomics to reduce the risk of musculoskeletal disorders. This course covers ergonomic principles, workstation design, and

best practices for manual handling and repetitive tasks.

Introduction to Radiation Safety

Understand the basics of radiation safety. This course covers the types of radiation, health effects, and safety measures to protect workers from radiation exposure.

Job Hazard Analysis

Learn how to perform a job hazard analysis (JHA). This course covers the process of identifying hazards, assessing risks, and implementing controls to improve workplace safety.

Laboratory Safety

Ensure safety in the laboratory with this course. Learn about chemical handling, equipment use, and safety protocols to protect yourself and others in the lab environment.

Ladder Safety

Prevent falls from ladders with this course. Learn about ladder selection, inspection, setup, and safe use practices to reduce the risk of ladder-related injuries.

Lead Awareness

Understand the hazards of lead exposure and how to protect yourself. This course covers the health effects of lead, safe handling practices, and regulatory requirements for lead in the workplace.

LOTO - Lockout-Tagout

Learn the lockout-tagout (LOTO) procedures to ensure safety during equipment maintenance. This course covers the steps for isolating energy sources and preventing accidental startup.

Machine Guarding

Ensure the safety of workers by implementing effective machine guarding. This course covers the types of guards, hazard identification, and best practices for machine safety.

Materials Handling

Handle materials safely to prevent injuries. This course covers manual and mechanical handling techniques, proper lifting methods, and safety practices for moving materials.

NFPA 70E Arc Flash

Understand the requirements of NFPA 70E for arc flash safety. This course covers electrical hazard assessments, personal protective equipment, and safe work practices to protect against arc flash incidents.

Office Ergonomics

Improve office ergonomics to enhance comfort and productivity. This course covers workstation setup, posture, and exercises to reduce the risk of musculoskeletal disorders in an office environment.

Office Safety

Ensure safety in the office with this course. Learn about common office hazards, emergency procedures, and best practices for maintaining a safe and healthy office environment.

Powered Industrial Truck Safety

Learn the safe operation of powered industrial trucks (PITs). This course covers forklift operation, maintenance, and safety practices to prevent accidents and injuries.

PPE - Personal Protective Equipment: Respiratory Protection

Ensure proper use of respiratory protection. This course covers the selection, use, and maintenance of respiratory protective equipment to protect workers from airborne hazards.

PPE Fundamentals

Understand the fundamentals of personal protective equipment (PPE). This course covers the types of PPE, proper use, and maintenance to ensure worker safety in various environments.

Preventing Workplace Harassment

Create a harassment-free workplace with this course. Learn about the types of harassment, legal requirements, and best practices for preventing and addressing harassment in the workplace.

Safety Audits

Conduct effective safety audits to identify and address workplace hazards. This course covers the audit process, hazard identification, and corrective actions to improve safety performance.

Safety Awareness

Promote safety awareness among employees. This course covers the importance of safety, common workplace hazards, and best practices for maintaining a safe work environment.

Scaffold Safety

Ensure safe use of scaffolding with this course. Learn about scaffold types, setup, inspection, and safe work practices to prevent falls and other scaffold-related injuries.

Sexual Harassment Prevention for Employees

Prevent sexual harassment in the workplace. This course covers the definition of sexual harassment, legal protections, and strategies for creating a respectful and safe work environment.

Slips, Trips & Falls

Prevent slips, trips, and falls in the workplace. This course covers hazard identification, preventive measures, and best practices for

maintaining a safe walking and working environment.

Spill Prevention, Control, and Countermeasure Plan

Develop and implement a spill prevention, control, and countermeasure (SPCC) plan. This course covers regulatory requirements, spill response procedures, and best practices for preventing and managing spills.

Struck-by and Caught-Between

Prevent struck-by and caught-between incidents in the workplace. This course covers hazard identification, protective measures, and safe work practices to reduce the risk of these types of injuries.

Trenching and Excavation

Ensure safety during trenching and excavation work. This course covers hazard identification, protective systems, and safe work practices to

prevent cave-ins and other excavation-related incidents.

Violence in the Workplace

Address and prevent workplace violence. This course covers the types of workplace violence, warning signs, and strategies for creating a safe and supportive work environment.

WHMIS 2015 - Standard

Understand the Workplace Hazardous Materials Information System (WHMIS) 2015 standards. This course covers the classification, labeling, and safe handling of hazardous materials in the workplace.

Workplace Cleanliness

Maintain a clean and safe workplace. This course covers the importance of cleanliness, proper cleaning procedures, and best practices for keeping work areas clean and organized.
